SENIOR SOLUTION ARCHITECT | SENIOR TECHNICAL MANAGER | DATA & AI DIRECTOR

Highly skilled Data Solution Architect, Technical Leader, and Sr Data executive with extensive experience in solution design and development with leading-edge technologies. I have a proven track record of delivering IT projects across diverse technology market areas. Successfully steered multiple critical projects to launch by developing the end-state solution architecture vision and resolving daily grassroots-level issues. I am committed to ensuring data integrity, security, governance, and compliance while delivering high-quality, actionable insights to support strategic decision-making.

TECHNICAL SKILLS

Databricks Platform: Unity Catalog (ABAC, Volumes) | Lakeflow (Connect, Designer, Spark Declarative Pipelines, Jobs) | Delta Lake | Auto Loader | SQL Warehouses | Databricks Apps | Lakebase | Delta Sharing | Lakehouse Federation | Managed DR

AI/ML & GenAI: MLflow | Model Serving | Mosaic AI Agent Framework | Agent Bricks | Vector Search | Genie | Lakehouse Monitoring | MLOps/LLMOps

Cloud & Integration: Databricks (AWS, Azure, GCP) | Azure Synapse Analytics | Azure Data Factory | Azure Stream Analytics | Microsoft Fabric | Spark 3.x | Kafka | IBM DataStage

DevOps & IaC: Terraform | Declarative Automation Bundles (DABs) | GitHub Actions | Azure DevOps | Databricks CLI & SDKs

Databases & Warehouses: Snowflake | Oracle | PostgreSQL | Teradata | Greenplum | Azure Cosmos DB | Hadoop

Languages: Python | PySpark | SQL | Scala | R | PL/SQL | Unix Shell | Hive

Reporting: Power BI | Tableau | Cognos | AI/BI Dashboards

Practices: Data Modeling (Star Schema, Snowflake Schema, Data Vault 2.0, Medallion) | Enterprise Data Warehousing (EDW) | ETL/ELT | Data Migration | Data Governance & Security | Disaster Recovery

CERTIFICATIONS

Databricks Certified: **Databricks Solutions Architect Champion**	Certification #: 108432797
Databricks Certified: **Databricks Machine Learning Associate**	Certification #: 106250872
Databricks Certified: **Databricks Data Engineer Professional**	Certification #: 93946589
Databricks Certified: **Databricks Generative AI Engineer Associate**	Certification #: 131044254
Databricks Certified: **Databricks Platform Administrator**	Certification #: 94757214
Databricks Certified: **CDW Migration Delivery Specialization**	Certification #: 129758533
Databricks Certified: **Hadoop Migration – All Clouds**	Certification #: 87946405
Microsoft Certified: **Azure Data Engineer Associate**	Certification #: I784-7571
Microsoft Certified: **Azure Data Fundamentals**	Certification #: I275-0528
Snowflake Certified: **SnowPro Core Certification**	Certification #: 92214106

PROFESSIONAL EXPERIENCE

Databricks (Employer: Sure Services LLC) **Sep 2023 – Present**

Forward Deployment Engineer • Resident Solution Architect

Led critical Databricks projects across Unity Gateway, Genie One, Genie Agents, Genie Code, Agent Bricks, Lakebase, OpenSharing, Lakeflow Connect, Lakeflow Designer, Lakeflow Spark Declarative Pipelines (formerly Delta Live Tables/DLT), Lakeflow Jobs (formerly Workflows/Databricks Jobs), Declarative Automation Bundles (formerly Databricks Asset Bundles/DAB), Databricks Apps, Unity Catalog ABAC, Unity Catalog Volumes, Mosaic AI Agent Framework, Model Serving, Vector Search, MLflow, Auto Loader, SQL warehouses, Databricks CLI and SDKs, Terraform Provider, Databricks Disaster Recovery, and Delta Lake.

- **CVS:** Upgraded Databricks from HMS to Unity Catalog (UC) and architected UC for data governance, including Attribute-Based Access Control (ABAC) for restrictive clients. Built an accelerator to migrate data and tables from HMS to UC and performed root-cause analysis for data-load performance tuning. Supported UWI and Observability initiatives through pipeline integration, performance testing, SDP migration and cutover, dashboard development, and troubleshooting of serverless connectivity and application issues.
- **Takeda:** Designed and delivered a reusable Databricks MLOps framework for R&D, standardizing model promotion across Dev, Test, and Prod using UC registered models, MLflow, DABs, and GitHub Actions. Validated it through production deployment of a protocol-optimization model with UI and CI/CD deployment paths, real-time model-serving REST endpoints, and Lakehouse Monitoring; completed handoff with runbooks, rollback/recovery procedures, and team enablement.
- **Merck:** Developed a Model Monitoring accelerator on the Databricks Lakehouse for real-time tracking of inference volumes and model drift; led requirements workshops and architected the Lakehouse model from the findings.
- **Thermo Fisher Scientific & Xcel Energy (Disaster Recovery):** Designed and validated a hybrid DR POC using Databricks Managed DR, Terraform, and targeted CI/CD recovery patterns for unsupported assets, covering workspace/metastore setup, identity and access validation, replication mapping, failover testing, and a repeatable onboarding model for additional production workspaces. Conducted a DR impact assessment and built a templatized DR code framework for Xcel Energy.
- **Protective Life & NYU Langone (Platform Automation):** Automated Databricks workspace creation and environment management using Terraform and CI/CD with separate environment configurations, validated deployment scenarios, strengthened network access controls, and resolved Databricks App access issues. Implemented Unity Catalog governance and configured environments for CCPA, GDPR, and HIPAA compliance.
- **DFCI & Ludia (CI/CD & Lakehouse):** Set up Databricks Asset Bundles (DABs) with Azure DevOps and GitHub (integrated with GCP Secret Manager) for end-to-end deployments, and designed a well-architected Lakehouse. Built an accelerator to move data from Databricks to Snowflake, advised on data exfiltration, and ran a DLT batch-loading POC with dynamic row filtering and column masking.
- **Suncor Energy & eClinicalWorks (Ingestion):** Architected an Auto Loader-based ingestion framework for batch and streaming across multiple file formats, automated workflow creation with DABs, configured Unity Catalog, and integrated model inference within each streaming batch.
- **BPM & Newell Brands (Declarative Pipelines):** Built a POC Lakehouse using Data Vault 2.0 and DLT; implemented Medallion Architecture data-quality monitoring, reusable templates, and Type 2 SCDs with the DLT-META framework, orchestrated through Databricks Workflows.
- **Grammarly, MMC Tech & Geisinger (Security & Governance):** Implemented row-level access controls and column masking for PII and provided security architecture guidance; built a secure, isolated Databricks training sandbox; configured system tables, persona-based consumption reports, and Lakehouse Federation to on-premises sources.
- **NRG Energy & Exact Sciences (Migration):** Converted Scala jobs to PySpark, cutting runtime from nine hours to about 40 minutes; migrated and optimized Snowflake views and UDFs for Databricks.

General Motors, MI **Nov 2012 – July 2023**

Technical Manager • Data Solutions Architect • Data Engineer

Worked across multiple cross-functional teams including Enterprise Data Warehouse and Dealer Data Management Teams.

- Received Critical Technical Talent (CTT) award from the Chief Technology Officer. This award is reserved for the top-performing team member who exemplifies exceptional skills, extensive experience, expertise, and dedication, exceeds their peers, and exhibits knowledge beyond their level.
- Successfully migrated on-prem ETL projects to Azure Databricks Lakehouse architecture, significantly improving data accessibility and empowering data-driven decision-making across the organization.

- Exemplified strong leadership and communication in architecting innovative solutions, coordinating global cross-functional teams, and driving successful project delivery through stakeholder alignment.
- Designed and implemented multiple POCs using a diverse range of technologies, including Azure Data Factory, Azure Synapse Analytics, Azure Databricks, IBM Infosphere DataStage, Power BI, Snowflake, and Tableau, to identify efficient and value-driven solutions. Additionally, coordinated workshops and training to enhance business user collaboration and efficiency in requirement management.
- Spearheaded process improvement initiatives that drove operational excellence and provided key recommendations to senior leadership, optimizing team and departmental productivity. Developed optimized ETL processes for integrating data from the Enterprise Data Warehouse into various platforms and created impactful reports and visualizations using tools like Cognos, Tableau, and Power BI to effectively communicate data insights.

Environment: Azure Synapse Analytics, Azure Databricks, Delta Lakehouse, Azure Data Lake, Azure SQL Database, Azure Active Directory, Azure Stream Analytics, Azure Monitoring, Azure Search, Azure Event Hub, Azure Storage, Azure Analysis Services, IBM Information Server 8.x/9.x/11.x, Power BI, Cognos, Tableau, Oracle, Teradata, Greenplum, Hadoop, Azure Cosmos DB, Python, R, PySpark, Spark, PL/SQL, SQL, Unix

Bank of America (Employer: ZeroChaos, Dallas, TX, USA) **Dec 2011 – Nov 2012**
IBM Information Server Administrator

- Established best practices for the development team, optimizing usage of Grid infrastructure, while training and managing the offshore team and collaborating with cross-functional teams and vendors to resolve issues.
- Extensively involved with cross-functional global teams to troubleshoot issues with Information Server 8.5 suite tools in grid, DB2, SQL Server, and Teradata environments.
- Created and tested a proof of concept for the Metadata workbench, Business glossary, and the import/export manager in the IIS suite.

Environment: IBM Information Server 8.x, DB2, SQL Server and Teradata

Ford Motor Company (Employer: Covansys (a CSC Company), Farmington, MI, USA) **Apr 2004 – Dec 2011**
Technical Manager • Data Solutions Architect • Tech Lead

- Expertly managed a team of 30 individuals that achieved exceptional outcomes and made significant strides toward goals by establishing a positive and inclusive environment, fostering engagement and alignment among team members, and encouraging open conversations and collaboration.
- Played an integral role as onsite coordinator accountable for monitoring the optimized utilization of both onsite and offsite resources and ensuring the attainment of project goals and timelines in coordination with teams and stakeholders.

Environment: DataStage 4.1/5.x/6.x, IBM Information Server 8.x, Oracle, Hadoop, Hive, PL/SQL, SQL, Unix

EDUCATION

Master of Science (MS), Data Analytics **Dec 2023**
Georgia Tech University, Atlanta, GA

Master of Science (MS), Electrical & Computer Science Engineering **Apr 2003**
Oakland University, Rochester, MI
